TABLE I.

AREA, HOUSES AND POPULATION.

This table shows for each district the number of towns and villages, the number of occupied houses, and the total urban and rural population, male and female. The districts are arranged, in this and other tables, in the order of natural divisions.

Similar figures are given for Pudukkōttai, Banganapalle and Sandūr, three of the five States attached to the Madras Presidency. The States of Travancore and Cochin, also attached to this Government, took their own census, and are publishing their own reports. The figures of these two States are therefore not included in this volume.

The area of some districts shown in this table differs from that shown in the corresponding table for 1911. This is partly due to the inter-district transfers referred to in the title page of Table II, and partly to revised computation of areas at resurvey.

For the purpose of column 3 (number of towns), cantonments have been treated as forming part of the towns in which they are situated. Villages are those defined as such for revenue administration. Villages wholly included in towns have been excluded from column 4.

Provincial Tables I and II, at the end of this volume, show for each taluk a few of the main statistics, such as total population, density, percentage variation since 1901, distribution by religion, and the number of literate persons.

TABLE II.

VARIATION IN POPULATION SINCE 1891.

This table compares the population as ascertained by the census of 1921 with that of the three last censuses. The figures of previous years for some districts differ from those shown in previous reports; for during the past decade changes have been made in the boundaries of some districts; the effect of these changes on the population of the districts has been calculated, and the figures of previous years have been revised so that they represent the population found at the time of enumeration in the area which now forms the district. The 1911 population of taluks entered in Provincial Table I has been revised in the same way.

This table was intended to present a comparison of the population of 1921 with that ascertained at each census since 1871; but in Madras there were in the decade 1901-1911 very extensive changes in the constitution of districts; so much so that in 1911 it was found impossible to ascertain the population of the present districts at censuses earlier than 1891. It has, however, been possible to reconstruct the 1871 and 1881 population of the groups of districts which constitute the "Natural Divisions" of the Presidency and these figures are given in an Appendix at the end of the Report.

TABLE III.

TOWNS AND VILLAGES CLASSIFIED BY POPULATION.

In this table, as in Tables I and IV, cantonments have been treated as forming part of the towns in which they are situated.

Before towns and villages were grouped into classes, the floating population enumerated in encampments, boats, trains, etc., was excluded from the total population shown in the volumes of Village Statistics. This floating population for each district is shown in the last column of the table.

TABLE IV.

TOWNS CLASSIFIED BY POPULATION WITH
VARIATION SINCE 1871.

This table shows the population of towns at each of the last six enumerations, and distribution by sex at the last three.

For the purposes of the census, a "town" includes every municipality, every cantonment, and every other continuous collection of houses, inhabited by not less than 5,000 persons, which is of an urban character though not under municipal administration. The numerical test was not, however, strictly applied, and nineteen places with a population of less than 5,000 persons have been treated as towns.

The towns are arranged in this table according to their population in 1921, and have been grouped in six classes :—

Class.	Limits of population.	Number of towns.	Classification.		
			* Municipality	Cantonment.	Others.
I ...	100,000 and over ..	3	3
II ...	50,000 to 100,000 ..	13	13
III ..	20,000 to 50,000 ..	35	34	..	1
IV ..	10,000 to 20,000 ..	109	31	2	76
V ..	5,000 to 10,000 ..	135	1	2	132
VI ..	Under 5,000 ..	19	1	..	18
Total ...		317	83	4	230

* Includes also towns which are both municipality and cantonment.

The forty-three towns which are printed in *italics* in this and the following table were treated as such for the first time in 1921; while six places which were treated as towns in 1911 have now been omitted. The population of previous censuses entered against the new towns represents that of the revenue villages now included in the towns.

For the towns noted in the margin, it has not been possible to ascertain the population at the censuses noted against their names. In these cases the variation in columns 13 to 15 is left blank; and to arrive at the variation entered in the corresponding columns against the Class Total, the population of these towns for which figures are not available for one year has been excluded from the population of other years also. This explains the apparent arithmetical discrepancy between the figures entered in columns 13 to 15 and those in columns 4 to 9 against "Grand Total, Class IV, Class V and Class VI."

TABLE VII.

AGE, SEX AND CIVIL CONDITION.

This table and that which follows are divided into two parts. Part I begins with a Provincial Summary, wherein statistics for every religion returned are given, and then deals with Districts and States; Part II deals with the sixteen towns treated as "Cities": the City of Madras is excluded from this Part, since it figures as a District in Part I.

The details of Districts and States show figures for four religions only—Hindu, Musalman, Christian, and the religion next in importance in the district. Where there is no fourth religion with an appreciable following, figures for all religions, other than the three main religions, are clubbed. In the former case, the total of figures for the several religions will not agree with the figures for "All religions" printed at the top of each district; in the latter case, they will. In Part II details are not given by religions.

In the Provincial Summary, details are given for each year up to five years of age; thereafter ages are grouped by quinquennial periods up to 70, and the remainder shown as "70 and over." In Part I (Districts and States) and in Part II, age-periods are given in less detail than in the Provincial Summary.

The ages of the people returned represent the actual numbers of years completed, not the current years of age.

This table deals with the literacy of the population classified by religions and age periods.

In general arrangement the table closely follows Table VII. But only four age-periods are shown, viz., 0—10, 10—15, 15—20, 20 and over. The literates shown in columns 6 to 8 include literates in English appearing in columns 12 to 14.

The following statement shows the Race and Sect of the Christian literates :—

Race.	Sect.	Literate.		Literate in English.

TABLE IX.

EDUCATION BY CASTE, TRIBE OR RACE.

This table shows for each caste, tribe and race in the Presidency, the population by sex, and the number in each sex of (i) the literates, (ii) the literates in English. The castes, etc., have been arranged in the order in which they occur in Part I of Table XIII. Castes in which there are no literates have been omitted; so the sum of the entries in columns 2 and 5 will be less than the figures entered against "Total Population." The numbers shown as literate in columns 3 and 6 include those shown as literate in English in columns 4 and 7.

TABLE X.

LANGUAGE.

This table shows the languages ordinarily spoken in this Presidency. The table is divided into the following three parts:—

A—Vernaculars of India: { (i) Vernaculars of the Presidency.
(ii) Vernaculars foreign to the Presidency.

B—Vernaculars of Asiatic countries beyond India.

C—European languages.

In each of these parts languages which are either too localised or are spoken by a very small number of people have been omitted and their totals clubbed together under the head "Other languages." A list of these, with the principal districts in which they are spoken, is subjoined:—

Language and locality.	Males.	Females.	Language and locality.	Males.	Females.	Language and locality.	Males.	Females.

TABLE XI.

BIRTH-PLACE.

This table deals with the birth-places of the population enumerated in this Presidency. It is divided into two parts: Part I containing the statistics for the Province as a whole and for each district and State comprised in it, while Part II gives similar information for the seventeen towns treated at the census as "Cities."

The various places of birth have been classified and arranged in accordance with the principles followed by the Census Commissioner in the India Tables. In Part I, Section A-II, and B to F, birth-places returned by small numbers of persons have been clubbed together under "Others" in their respective classes. Details of these are given below:—

TABLE XII.

INFIRMITIES.

The infirmities recorded at the census were insanity, deaf-mutism, blindness, and leprosy.

The table is divided into two parts—Part I shows the distribution of the persons afflicted according to age, and Part II their distribution according to locality.

Some persons were returned as suffering from more than one infirmity. In the table they have been shown under each. This explains why the total “Population afflicted” in columns 2, 3 and 4 does not quite agree with the total of the figures for each separate infirmity. The following is a list of these cases:—

	Persons. Males. Females.		
	Total
Insane and deaf-mute
Insane and blind
Insane and leper
Deaf-mute and blind
Deaf-mute and leper

TABLE XII-A.

INFIRMITIES BY SELECTED CASTES, TRIBES AND RACES.

In 1901 this table, though then optional, was prepared for *all* castes in the Presidency. In 1911 it was restricted to 27 castes representing 44 per cent of the Hindu and Animistic population, and to the entire Musalman, Anglo-Indian and Indian Christian communities. The present table shows all castes, tribes or races, in which 100 or more persons have been returned as suffering from one or other of the infirmities.

Persons suffering from more than one infirmity (see title page of Table XII) have been counted separately for each infirmity.

TABLE XIII.

CASTE, TRIBE, RACE OR NATIONALITY.

This table is divided into two parts. Part I shows in alphabetical order the castes, tribes and races returned by the population enumerated in the Presidency, with the principal languages spoken by members of each caste. For castes too small for inclusion in Part II which are confined to limited areas, the last column shows exactly where they are found.

Particulars of the nationalities included under the term "European and Allied Races" and of the tribes of Musalmans are given at the end of this part.

Part II shows the districts in which the principal castes, tribes and races are chiefly found. Figures are given here only for those castes, etc., which contribute more than one per mille to the Presidency population, and a district is mentioned only when the caste, tribe or race contributes more than one per mille to the district population.

TABLE XIV.

CIVIL CONDITION BY AGE FOR SELECTED CASTES.

This table deals with certain selected castes in the districts where they are specially numerous.

2. The caste population shown in this table differs from that in Table XIII, because in sorting for the two tables, the amalgamation of sub-castes with the main castes was handled differently.

CIVIL CONDITION BY AGE FOR
SELECTED CASTES.

TABLE XVI.

EUROPEAN AND ALLIED RACES AND ANGLO-INDIANS BY AGE.

This table is divided into two parts—one for districts and States and the other for cities.

Fourteen Armenians, enumerated in the city of Madras, have been included in the "European and allied races." Eight of them were males (age 0-10, 2; 10-16, 1; 18-30, 2; 40-50, 1; 50 and over, 2) and the remaining six females (10-16, 2; 40-50, 3; 50 and over, 1).

The total of "European and allied races" shown in this table exceeds that shown in Table XV by 33 persons (males 18, females 15); the reason is that Europeans who did not return themselves as Christians are not entered in Table XV.

TABLE XXI.

OCCUPATION BY SELECTED CASTES, TRIBES OR RACES.

This table shows the principal occupations followed by certain selected castes, tribes and races in the Presidency. In previous censuses, the statistics in the corresponding Table (XVI) referred only to selected localities in which each caste was predominant; but in this table figures are given for the caste throughout the Presidency. On this occasion, under the orders of the Government of Madras, the columns showing the traditional occupation of each caste and the numbers engaged on that occupation have been omitted.
